UPDATE on Back Ditches Running the length of the back of properties along North Drive & Bayview from Northshore Road to Road 102. This was first done in May of 1995. In Dec 2002 the RM re-dug the back ditches. Last year, clearing the brush from back ditch system was done August 2016. This year RM Land Surveyors came into LSH on May 31-2017 to map the back ditch. Once the ditch has been prepared, grading will take place. The two property owners, which own the land behind the back ditch, have been contacted and have verbally agreed to have the grading done. Once the property owners have "signed" the agreement, the RM can then proceed to apply for a permit from Conservation.

Canadian surgeons & Health Canada warns people about metal BBQ bristles they are urging people to throw out wire-bristled barbecue brushes, because none of them have figured out a sure fire way of removing the wires when they get stuck in people's throats. The thin, sharp wires can come off the brushes, attach to barbecue grills and cling to food without being noticed. If it's swallowed it can cause damage to the throat and epiglottis, which is the flap of cartilage that covers the opening of the windpipe when swallowing. Use a bristle free brush instead, and there are plenty of options, which cost about \$5-\$7 more than the traditional metal bristle brush.

Interlake-Eastern
Regional Health Authority
